

## CAS 111D: Beginning Website Creation: Dreamweaver

Introduces basic elements of website creation using Adobe Dreamweaver. Includes web terminology, basic HTML, uploading pages to a server (FTP), site management, tables, layout, stylesheets (CSS), rollovers, optimizing graphics, and accessibility.

### Course Student Learning Outcomes

Upon successful completion of this course, student will be able to:

- Use Adobe Dreamweaver to create personal and/or business websites following current professional and/or industry standards.
- Use critical thinking skills to design and create a basic, multi-page website.
- Use Adobe Dreamweaver and a stand-alone FTP program to upload files to a web server.
- Be prepared to pursue future courses in website development and design.
